github.com/anirudhkhemriyaa — leetcode.com/u/Anirudha-khemriya — Gwalior, Madhya Pradesh

Technical Skills

Languages: Python, C++, JavaScript
Backend: Django, FastAPI, Django REST Framework (DRF), REST APIs
Databases: PostgreSQL, Redis, Neo4j
Tools: Docker, Git, GitHub, Linux, Nginx, Gunicorn
Core CS: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks
Backend Concepts: Authentication & Authorization, API Design, Async Task Queues, Background Job Processing, Caching, Database Design, Fault Tolerance, Rate Limiting, System Design

Projects

GeoImpact Intelligence — FastAPI, Neo4j, NetworkX, Next.js 2026

- Built a graph-driven event intelligence platform to model cascading geopolitical, cyber, economic, and disaster events.
- Designed an evidence scoring engine (**HIGH / MEDIUM / LOW / INSUFFICIENT**) to dynamically control propagation depth and confidence-based outputs.
- Implemented graceful degradation mechanisms to handle sparse evidence, missing events, and partial API failures for deterministic behavior.
- Integrated graph traversal and dependency modeling using **Neo4j + NetworkX** for impact analysis.

Workflow Automation Platform (AWD) — Django, PostgreSQL, Redis, Celery, Docker 2025

- Built a scalable workflow automation platform using **Celery + Redis** for asynchronous background task execution.
- Designed REST APIs with subscription plans, rate limiting, and real-time usage tracking using **Django REST Framework**.
- Implemented retry logic and fault-tolerant task execution to prevent task loss during service failures.
- Containerized the application stack using Docker for reproducible deployment and environment consistency.

GitHub: github.com/anirudhkhemriyaa/AWD

Assistive Vision System for Visually Impaired — FastAPI, YOLO, OpenCV 2025

- Built a real-time computer vision pipeline using YOLO-based object detection for voice-guided navigation.
- Achieved **10–11 FPS** throughput with approximately **200–400 ms** inference latency during live testing.
- Integrated FastAPI-based backend services for real-time processing of mobile camera streams.
- Explored edge inference approaches to reduce hardware dependency for standalone accessibility usage.

Education

Institute of Technology and Management
B.Tech in Computer Science Engineering

Aug 2024 – May 2028
Gwalior, Madhya Pradesh

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Achievements

Kurukshetra – TechRythm National Hackathon 2025

- Secured **Top 10 nationally** by building a grievance management platform for a government workflow automation use case.

LeetCode

- Solved **200+ problems** focused on data structures, graph algorithms, dynamic programming, and problem-solving patterns.
